

» The Intelligent Charging System

Our charging system intelligently distributes power where and when it is needed, ensuring the devices charge in the quickest and most energy efficient manner every time—automatically! With its new LED indicators, the Intelligent Charging System will even tell you how long it takes for the devices to charge.

» Versatility

Accommodates a wide variety of brands and models of devices, so it can continue to add value through multiple device refreshes.

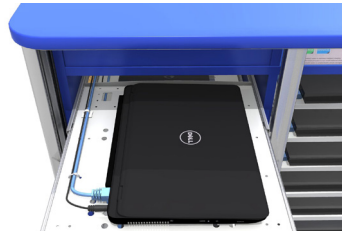

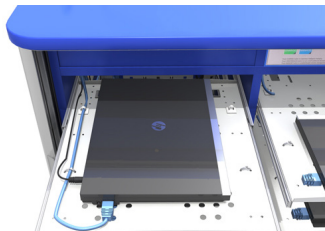

» It's All in the Details

We put a lot of thought into the convenient features of our carts such as pull-out trays, and streamlined cable management which enable easier access to devices, so there is less damage and less hassle. Secure doors slide back into the frame of the cart to create a smaller working footprint and provide safe and efficient use of space.

» Remote Management Compatible

Enables remote management via Wake-on-LAN functionality, so notebooks can be imaged in the cart and updates can be remotely scheduled and automated using any deployment software.

**Extra space between trays
for extended batteries!**
