

Charging Mobile Technology in an Evolving EdTech Landscape

Charging Solutions for Every Grade Level, Budget, & Program

Mobile technology is playing a more important role in education than ever before, but school districts also face increasing complexities in implementing devices. Choosing the right charging solutions is an important element in keeping active devices in the hands of teachers and students.

Create a charging infrastructure that supports educational goals & protects instructional time.

- Eliminate the need for device AC charging adapters and cut down on replacement costs.
- Actively charge devices while they are in use throughout the school day.
- Leverage USB-C for both non-USB-C devices and future technology landscapes.

NEW! At-the-Desk Charging (Without the Extension Cords!)

ACTIVE CHARGE UPGRADE FOR ADAPT4 CHARGING STATIONS

Supplement Charging in 1:1 Take-Home Classrooms

ADAPT4 CHARGING STATIONS

- Quick-Sense USB-C technology—no chargers required
- Lightweight, yet durable
- Adapters for charging non-USB-C devices

Scale from Hybrid to 100% In-Class with Ease

ESSENTIAL CHARGING STATIONS

- Can be wall-mounted or used on tabletop
- Adjustable to fit different device types
- Customize with school pride station colors

Smoothly Transition from Shared Devices to Class Sets

FLEX-SHARE CHARGING STATIONS

- Modular design for versatile applications
- Mounts to walls or desks to fit in any space
- Mobility bundle available

Upgrade Old Carts to Intelligent Charging

INTELLIGENT CHARGING MODULE

- Install on a cart/station or wall-mount
- Connect up to 64 devices to one system
- Delivers an efficient charge with automatic power sensors and charging logic

Accommodate New Devices with More User-Friendly Carts

ULTRA-LIGHT INTELLIGENT CARTS

- Easy cable management and Intelligent Charging System
- Lightweight, ideal for transporting devices
- Turnkey deployment services available

About JAR Systems

Since 2004 JAR Systems has provided smarter, more versatile ways to charge and secure ever-evolving technologies. We work closely with our clients to develop products that support and streamline how mobile technology is used for learning and working in real-world environments. Our focus is on being a leading manufacturer of innovative charging solutions and designing efficient products that will work dependably for many years down the road.
